

Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)

MONITORING, ROUTINE (DBP), MAJOR/CHLORINE

The CLAUDE MUNICIPAL WATER SYSTEM, water system PWS ID 0060001 has violated the monitoring/reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not our drinking water is safe from microbial contamination.

This violation occurred in the monitoring period 1/1/2019 – 3/31/2019.

We are taking the following actions to address this issue:

The PWS is and does monitor on a regular basis as required by TCEQ. We have changed our internal procedures to ensure that all required and necessary reports are sent to TCEQ within a timely manner as required.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e. people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact Wade Miller at 806-337-0388.
